10-Year Limited Warranty (Covers Manufacturing Defects And Fire Damage)

Key Rapid Troubleshooting Guide

Key File Card		
• Symptom	• Possible Cause	• Solution
Key cannot be inserted	Wrong key/Foreign object in keyhole	Check the key number and clean the lock
Key cannot be turned	Not fully inserted/Internal jam	Ensure the key is fully inserted, then attempt a very slight pull-back motion while turning.
Key turns but door does not open	Latch not fully retracted/Slight deformation	While keeping the key turned, gently tap the door and attempt to pull it open.
Key cannot be removed	Not aligned to extraction position	Slowly turn the key to find the vertical position where it can be removed.
Spare key also does not work	Lock cylinder malfunction	Stop attempting to open and contact customer service.

Important Notice

1. Do not use oil for lubrication: Only use specialized graphite powder to lubricate the lock cylinder.
2. Do not force operation: Avoid damaging the lock mechanism.
3. Do not panic after a fire: Immediately contact after-sales service to arrange inspection/replacement.

Keys are the key

Keys are the only way to ensure you can always access the safe. Key management protocol (strictly adhere to)

Test Immediately

Upon receipt, test each key multiple times by locking and unlocking the door to ensure proper function.

Store Securely

Keep the spare key sealed and stored separately. Never place it inside the safe.

Record Serial Number

Each key has a unique serial number. Record it immediately—this is required for the lost key protection service (10-year free key replacement.)

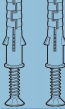

Key File Card

• Safe Model	
• Purchase Date	
• Key ID	
• Location of Spare Key	
• Customer Service Address	

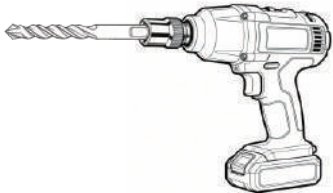

Part List

1. Please check all accessories and parts against the table below before use.
2. If any items are missing or the product was damaged during shipping, please contact us. We will reply within 24 hours.

Part Name	Picture	Qty
Safe box		1
Key		2
Key Tag		1
Manual		1
Expansion Bolt		2
Fire Seal Plug		6

Installation Tools (Not included)

Hammer Drill with Bit(3/8")

Placement Notice

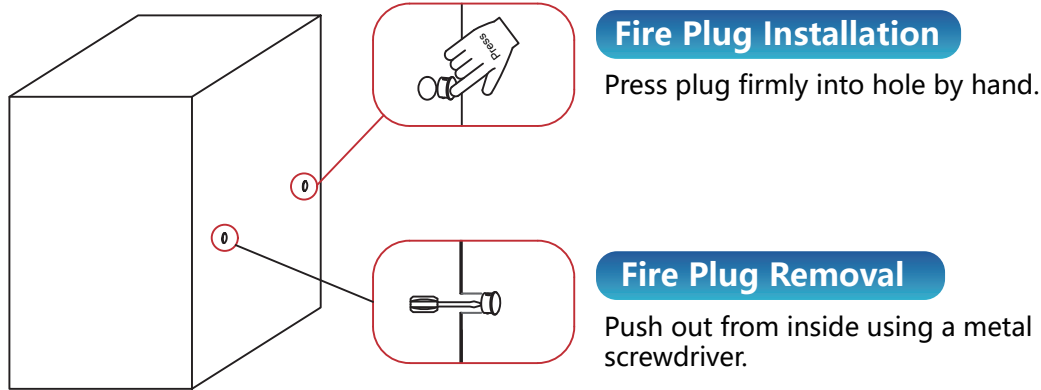

For fire-resistance performance, mounting holes are located on the back panel only.

Rear mounting holes are designed to enhance security while minimizing impact on fire resistance.

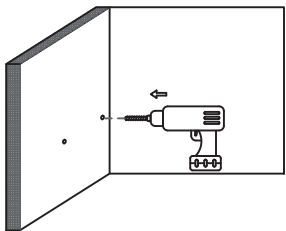

Disposable fire plugs are used to seal unused mounting holes for fire protection.
Installation steps are as follows:

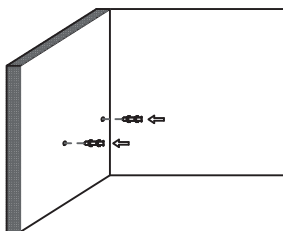

Anchoring Steps (Permanent Installation Only)

Step 1:

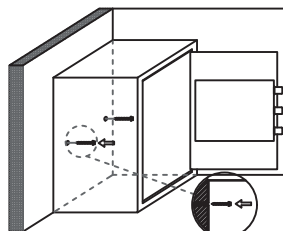

Position the safe and mark the mounting location.

Step 2:

Align the mounting hole with the floor or wall anchor point.

Step 3:

Secure the safe using appropriate anchor bolts

Multi-layer Composite Fireproof Structure

1. Patented fireproof material A

2. High-Temperature Coated Alloy Steel

3. Patented fireproof material B

4. High-Temperature Coated Alloy Steel
